► FEATURES:

Clip provides solid fastening to a variety of flat substrates. Rectangle, square & diamond shapes can be installed vertically or horizontally, and on curved surfaces.

► TESTING:

ASTM E330 -
Load Structural
Load Deflection

► INSTALLATION:

TRIM:

All flashing and trim will be fabricated by LITSCO or a qualified fabricator. Flashing shall be .040" aluminum or 24 GA steel.

SUBSTRATES:

Panels can be installed directly to a variety of substrates, which allow for proper tapping of threaded or nailed fastener.

FASTENERS:

#12 pancake self-drilling stainless steel for metal substrate.

PANELS:

Start from corner location and install sideways first, then work upward.

MAY BE INSTALLED WITH STAGGERED OR STRAIGHT LINE SEAMS.

NO SOLDERING OR FLATTENING OR SEAMS REQUIRED IN FIELD

**Always follow manufacturer's guidelines for proper storage and handling prior to install.*
